## Series of Action Research -Workshop

Between January 2024 and March 2024, Rizvi College of Education's Research Cell, led by Dr. Priyanka Pandey, conducted a comprehensive series of 6 workshops focused on Action Research for S.Y.B.Ed students during their Semester IV. These workshops were meticulously designed to guide students through the Action Research process, beginning with an introduction to its importance and methodology. The initial sessions laid the foundation by discussing the conceptual framework of Action Research, while subsequent workshops delved into the practical aspects, such as chapterization and data analysis. Conducted in the computer lab, these hands-on sessions equipped students with the necessary skills to analyse data using Excel and create graphs, ensuring they were well-prepared to handle their research projects with confidence. The Action Research projects undertaken by the students addressed a range of pressing and sensitive issues encountered during their internships, reflecting the relevance and applicability of their work. Topics included critical thinking and communication skills for 21st-century learning, social adjustment and academic achievement comparisons between students from orphanages and normal homes, the impact of social media on students' mental health and sleep patterns, and the influence of parental involvement on academic performance. By working closely with teacher educators and schools, the student-teachers were able to explore and address these issues in a meaningful way, contributing to both their professional development and the broader educational community. This series of workshops not only enhanced the students' research capabilities but also fostered a deeper understanding of the challenges and opportunities within the educational field.
